OBJECTIVE

Software Development Engineer skilled in Python, Java, and JavaScript with experience delivering production-ready full-stack and ML-powered systems. Built scalable apps using MERN, LangChain, and TensorFlow — combining backend efficiency with intelligent automation to enhance user experience and performance.

EDUCATION

ST. JOSEPH'S INSTITUTE OF TECHNOLOGY

B.E Computer Science Engineering

CGPA: 8.32/10

Chennai , TN

May 2027

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C

Frameworks & Tools: React, Node.js, Express.js, TensorFlow, LangChain, Scikit-learn, Tailwind CSS

Databases: MongoDB, SQL

Concepts: OOP, DSA, System Design, Machine Learning, Web Development, Deep Learning

Other Tools: Git & GitHub, Power BI, N8N

INTERNSHIP

Cetas Infomation Technology Pvt Ltd.

Summer Internship(1 Month) – Frontend Developer

May 2025 – June 2025

- Developed responsive UI components using React and Tailwind CSS for client dashboards.
- Optimized page load time by 25% and improved component modularity using reusable state hooks.

PROJECTS

E-Waste Management System (Reviron) | MERN Stack

Engineered a full-stack MERN web app to manage and resell e-waste with secure authentication and product tracking. Handled 50+ mock listings and reduced data retrieval time by 30% via optimized MongoDB queries.

Spotify Replica Platform | MERN Stack

Built a full-stack music streaming web platform replicating Spotify's core design and functionality using the MERN stack.

Cold Email Generator | Python, LangChain

Implemented an AI-powered B2B outreach generator using LangChain and LLMs to personalize cold emails from job data. Automated email generation process — reducing manual time by 90% for each campaign.

College Website with AI Chatbot Integration | MERN + LangChain

Recreated institutional website UI and integrated an intelligent chatbot using LangChain to answer admission-related queries with >90% accuracy.

ACHIEVEMENTS & CODING PROFILES

- Solved 1,800+ coding problems: Skillrack (1050+), CodeChef (550+), LeetCode (250+), Geeksforgeeks(100+).
- Finalist – YESIST'24 (AI for Sustainability); Participant – VIT Hackathon, SRM Datathon, 3 college hackathons.
- Certifications: Oracle Gen AI Certified, NPTEL (Python for Data Science, Java Programming), Udemy (Python Bootcamp).
